## **Report on – “Structuring Success: As a Data Analyst”**

**Date: 9<sup>th</sup> August, 2025**

**Time: 7.00pm – 8.00pm**

### **OBJECTIVES OF THE EVENT:**

The objective of the webinar was to provide students with a realistic and honest understanding of the data analyst role, emphasizing that professional success required a balance of technical proficiency and practical problem-solving skills. The session aimed to bridge the gap between academic learning and real-world application by highlighting the importance of logical thinking, data storytelling, and the ability to communicate actionable insights effectively.

### **ABOUT THE EVENT:**

The ISTD Student Chapter, SVCE, together with the ISTD Chennai Chapter, organized an insightful webinar titled “Structuring Success: As a Data Analyst.” The event focused on providing a clear and honest picture of the data analyst role, moving beyond technical buzzwords to showcase the reality of the profession. Instead of concentrating only on tool proficiency, the session encouraged students to explore the importance of logical thinking, problem-solving, and the ability to communicate actionable insights effectively.

The session was handled by Ms. Bhagya Sree Agravaram Saravana, who shared practical insights drawn from her own professional journey and real-world work experience. Through relatable examples from various industries, she guided students to understand how technical skills in SQL, Python, and Excel must be paired with data storytelling to drive meaningful decisions. Her guidance helped participants feel more confident about their career paths, focusing on intentional learning and the true impact of the data analyst role.

## **SESSION :**

### **Speaker Address:**

**Ms. Bhagya Sree Agravaram Saravana** delivered a deeply authentic session that stood out for its "down-to-earth" approach. She immediately challenged the common misconceptions beginners have, explaining that the role of a data analyst is not about glorifying "fancy code" but about solving core business problems. She stressed that technical tools like SQL, Python, and Excel are simply the starting point; the true value of an analyst lies in their ability to break down complex problems and communicate insights that stakeholders can act upon.

A major highlight of her talk was the Career Roadmap. She urged students to stop chasing shortcuts and instead build meaningful, well-thought-out projects that reflect real-world business scenarios. She explained that one high-quality project is significantly more impressive to recruiters than a collection of random practice notebooks. Furthermore, she provided a balanced view of AI and automation, explaining that while the field is evolving rapidly, analysts who possess strong domain knowledge and logical reasoning will continue to thrive.

### **Participant Experience:**

The participant experience was highly interactive and noticeably different from typical career seminars. From the outset, students and faculty members were drawn in by the speaker's directness. Ms. Bhagya Sree addressed the specific anxieties students face—such as identifying which skills to prioritize and how to secure internships. Her openness about her own struggles and learning curve made the session feel relatable, transforming the audience from passive listeners into inspired future professionals.

## **INTERACTIVE Q&A:**

During the interactive segment, students engaged in a vibrant discussion regarding industry expectations.

Instead of providing generic advice, the speaker offered granular details on:

- **Skill Acquisition:** How to master the fundamentals before moving to advanced automation.
- **Portfolio Building:** The transition from academic projects to industry-ready portfolios.
- **Industry Application:** How simple data insights can influence major decisions in healthcare, finance, and tech.

## **CONCLUSION:**

The online session left a lasting impact by creating a vital shift in perspective. It successfully bridged the gap between academic theory and the high-pressure environment of the tech industry. By providing an actionable roadmap—focusing on foundational skills, internships, and communication—the webinar empowered participants to approach their career paths with intention and maturity. The event concluded on an encouraging note, leaving students not just motivated, but genuinely better prepared for the professional challenges ahead.

## **VOTE OF THANKS:**

The Vote of Thanks was delivered by expressing sincere gratitude to the resource person, organizers, faculty members, and participants for making the webinar a success. Special appreciation was extended to Ms. Bhagya Sree Agravaram Saravana for her valuable honesty and practical guidance.
